

W.

Sustainable future for all.

Corporate profile

WATTCROP

SOLAR PV | WIND | ENERGY STORAGE

W.

Ethical development of renewable energy projects.

Solar PV and on-shore wind projects in harmony with the local communities and the environment.

Driving the transition to a greener energy for carbon-zero future.

W.

2019

Wattcrop is incorporated by international investors with the aim to be a major developer in Greece.

2020

We exceed our initial development target of 250MWp in Renewable projects.

Our commitment

Walking on the footpath of sustainable development and ethical investment.

- ✓ To prioritise our strong cooperation with the local communities and the people.
- ✓ To develop and construct in a sustainable way with strict quality controls in every stage
- ✓ Believe in improvement of life quality from ethical entrepreneurship and sustainable development
- ✓ Commit in the protection, preservation and enhancement of the environment prioritising it against profits.

2021

Cero Generation / Macquaire GIG become a majority partner after successfully concluding the transaction.

WATTCROP
Sustainable future for all.

Land Leasing

We lease or buy land for project development – If you are a landowner leasing land contact us directly.

Project Licence Acquisition

Acquisition of fully or semi licensed projects – Do you have fully or semi licensed projects? We are interested in acquiring them.

Strategic Partnerships

Strategic Partnerships for the development of RES project portfolios – Are you looking for a partner for your portfolio? We are here to discuss.

A few words about Wattcrop

Wattcrop is an Renewable Energy development platform with international pedigree and activities mainly in South East Europe and the United Kingdom. We Develop, Construct, Manage and Operate Renewable Energy Generation and Storage Projects.

Our management team with long experience and market engagement both within European and International environments has delivered projects totalling more than 2GWp of installed capacity.

Since June 2021, Wattcrop is part of a Joint Venture with Cero Generation a Macquarie's Green Investment Group portfolio company. Cero Generation is one of the leading development platforms of new renewable energy generation projects in Europe with a pipeline exceeding 8GWp both in Solar PV and Wind.

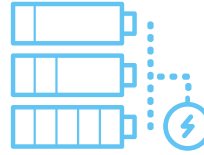

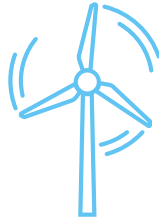

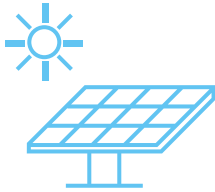

During the lifetime of our projects we adopt and apply industry best practices with strict quality control standards.

We commit to our vision for Carbon Zero Energy Generation with tangible benefits for the local communities. We deliver on our commitment by realising real projects with social impact on local level.

Our Mission

To Develop and Construct project with respect to the environment, striving to protect and enhance biodiversity, in harmony with people and the local communities, delivering a sustainable future for all.

Sustainable Future for All
